Permanent collection

**T**he world spins round. Everything changes. Few things really belong. It's a given fact, but this does not put us off – it gives us incentive. Because in MP we are passionate about movement. Our products, our services, the world through our eyes, revolve around movement. It does not just involve the force that takes us from one place to another. It is also what makes things move forward, evolve. It is almost an art. An art that we have developed thanks to a technique which combines technology, creativity, aesthetics, functionality, precision.

Movement moves us: it guides the way that we work, it calls for us to fully integrate our clients' ideas. It makes us fulfil your desires as if they were our own, working together to find the perfect creation. By understanding that the result is a living being, we keep working beyond the project deadline.

On the following pages we present our "creations". They are emblematic pieces; they truly represent our style, our philosophy. It is the best way that we can introduce ourselves. Because these creations have brought us to where we are today, and because with them we are moving forwards into the future.

International collection

Durability.  
It won't hold you back.
